

Facilities Project Manager
Full Time Position
Clean Tech Company
Denver, Colorado
Salary Range: \$100,000 - \$130,000

Starfire Energy is a clean energy company that walks the walk. We are a Colorado Public Benefit Corporation. Our focus is the generation of carbon-free ammonia (NH₃) and derived fuels. We have a proprietary and flexible process for making ammonia from air, water, and clean energy. Our ammonia cracker then produces an ammonia-hydrogen blend fuel or pure hydrogen. The emissions from ammonia fuel are nitrogen and water. We are providing a completely CO₂-free way to make and use fuel for long term energy storage, transportation, and heat applications.

As a high-growth, start-up organization, we offer the unique opportunity for you to contribute in many facets of the business and advance your career. You will enter a small, dynamic company that is executing aggressive growth, and you will help commercialize clean technologies that will become a part of the world's energy infrastructure. We value creativity and integrity and we plan for sustainability in all that we do.

This position will provide expert project management to support achieving the growth of a cutting edge green energy startup.

As a key member of our operations team, you will be managing all aspects of our facilities projects – large scale new plant construction as well as small, detailed activities. You are a skilled project manager and have at least four years of experience in construction or facilities management. You are technically savvy, goal-oriented, and a strategic problem solver who glides between competing priorities with ease.

This position is not eligible for work visa (H-1B), and successful applicants must be fully vaccinated and boosted against COVID-19.

Essential Job Duties:

- Manages all aspects of facilities projects, including project scope, budget, timelines and vendor management
- Actively monitors all activities to ensure projects are completed safely, with high quality, on time and on budget
- Assures regular facilities maintenance is carried out and that multiple facilities are effectively managed; including assigning priority to work orders and coordinating repairs with vendors
- Works cross-functionally with vendors and internal stakeholders to mitigate risks and obstacles
- Proactively communicates project status, schedules, and any issues to stakeholders and management
- Assists in drafting RFPs and participating in all vendor selections
- Maintains detailed records and documentation associated with all projects
- Reinforces our commitment to sustainability and diversity in all that you do

Requirements:

- PMP or CAPM certification and 4+ years of large-scale facilities project management experience - preferably in construction, chemical manufacturing or Oil & Gas

- Demonstrated experience with formal project management methods such as Waterfall and Agile
- Technically savvy with strong command of office basics - CAD knowledge a plus!
- Keen eye for the details including documenting meetings, decisions, site conditions, and change orders
- Naturally self-directed, resourceful, with an agile mind – you can adapt and convey shifting priorities
- Exceptional written and oral communications skills - comfortable delivering regular communications to individuals at all levels of the organization
- Superb work ethic and ability to accept feedback

Additional beneficial skills/experience

- Excellent critical thinking skills
- Strong teamwork skills
- Ability to function and thrive in a startup environment
- Solid interpersonal skills
- Desire to learn with high adaptability

Starfire Energy is committed to hiring and retaining a diverse workforce. We are proud to be an Equal Opportunity Employer, making decisions without regard to race, color, religion, creed, sex, sexual orientation, gender identity, marital status, national origin, age, veteran status, disability, or any other protected class.
